## **Run & Hide**

With no escape in sight, Youngho must roam the halls of his school at night searching for a way out. During this journey he will encounter many threats hell-bent on killing him. Running is the best way to avoid danger — unfortunately, Youngho isn't much of an athlete, so he can't run forever. Find a place to hide and keep your mouth shut!

## **Explore**

The Coma is a harsh world. This twisted reality of your high school knows no kindness. Use maps, notes, and tips from other characters to navigate your way through the world and figure out how you became trapped in such a bleak place.

## **Survive & Escape**

Everything is out to get you. Youngho will have to avoid a persistent killer, lashing tentacles, and more to survive the school. Unfortunately, health is in short supply, and if you're not careful, you will die. The good news is that save-points provide a welcome breather from the onslaught of things trying to kill you.

## **Korean Horror**

The Coma provides a glimpse — albeit a horrific one — into the life of Korea's overworked high school students. We hope you'll enjoy our infusion of Korean culture into the survival horror genre.

## **Gameplay**

As Youngho, you must navigate through the three connected buildings of your high school using your wits. Along the way, you will find unlockable art, notes, and easter eggs that expand on The Coma universe. Oh yeah, did we mention the relentless killer, traps, and inevitable game overs?

After spending all night studying for the last day of Sehwa High's final exams, Youngho has an eerie dream. He arrives at school the next morning and learns someone tried to commit suicide in school the night before. Despite this, class goes on!

Youngho drifts asleep during the final to find himself trapped in the school at night. The only problem is...he's not alone. You can run. You can hide. Can you survive while piecing together the nightmarish mystery of Sehwa High?

- A new horror theme.
- New character animations.
- New hiding mechanic.

### Staff of the Scent

Staff

Every member of the order had a hand in their making, which is why they are so terribly powerful. They all look like one another, though each one bears distinct markings that pertain to the sense to which it is aligned. Just as the Tivelites seek to solve the mysteries of life using the five senses, each of the hierophants (and her staff) represents one of those five senses.

51 tracks of awesomeness, including the trailer track!. It took me a few tries to realize how the controls work. I really like this game if you are bored this game is worth to play  
But there still are some bugs.

Pros:

- fun
- graphics are nice for an early access game

cons:

- hard a bit

And that is it. Buy if you are bored bois. I am very much in love with the 'Indie' genre of games. It is inspirational when I hear a group of only a few people who go through the effort of making a game all by themselves. This game, being my game nomination of the year, has amazing art, an amazing soundtrack, a great storyline and decently appealing gameplay which makes for a fantastic game altogether. The only difference is, it was made by only one man.. This is a short puzzle game with a really nice art style and I love the soundtrack!

I could work out most of the puzzles, only one or two were a bit obtuse. Likable main protag, the range of characters were entertaining.

Would recommend if you like point and click puzzles, or 70s spy genre, fun writing in a game. Just going to give a heads up!

Very early development, bad optimisation, almost no content.. Good game but needs more levels. sequel to dat strange game.. its awesome \*\_\_\_\_\*

menu is working fine with arrows and "z" key, noobs.

sometimes i have such states of mind when i want and i will play this game.

ty Dylan for making such games, they're beautyfully strange and mindfull + blending with hardcore and past century design  
p.s.: separate thanks for Sisters of the Amniotic Lens - dat is MASTERPIECE!. Not quite as good as the Samurai in my opinion, but then again I haven't really played through the Fallen Palladin as much. Very cool expansion.. Fun Game, Very relaxing with strategy and thinking involved. You make it as far as u can but get to keep stuff you earn so you make it farther each time. Very cool and cute art and 4 different heroes to try out. Lots of content. Definately recommended.. this game is awful and i regret purchasing it

---

It's good to play a puzzler in this day and age with some meat on its bones. But Art of Gravity fizzes and pops in all the right ways. It's fresh and intriguing, and it's not like anything else you've ever played before. And that's definitely to its credit.

This isn't a game that you're going to run through in a single sitting, it's going to take some time and consideration. But if you're looking for something to settle down with for the long haul, for something clever to really sink your teeth into, then you're in luck.

There's a thick and engaging experience here, and the way it builds on its sturdy foundations with intriguing new structures makes it one of the finest head-scratches that has hit mobile in the past few months.. bad controls. IT GOOD

GET IF HAVE FRIENDS

NO FRIENDS DON'T GET. This game.. Oh my lord was this fun. Would recommend the story is actually a bit fun. I was surprised there was an option to go to a bot and just hit level up.. Really skips the need to grind and get the good cutscenes. Was sad there was no give up option and way to do it with most enemies.... As of right now I can't jump while on bridges. So I can't progress through the game. 0/10 unless somehow someone fixes the issue

EDIT: FIXED NOW!. This is an amazing use of hyperbolic geometry for a game!. Loving the strategy in this game, once you get the main characters in the story to add to your clan it's a ton of fun trying to figure out the strategy of who to use and in what order so they all help each other survive the levels. The level challenges seem to change so they are repeatable for gold or experience and some add a bit of complication when they force you to use a specific character and character level..

I can see myself spending lots of time playing and replaying the levels. Some of the Arena type challenges add another aspect to the game and give you an extra piece to conquer.

Story and comic animations are pretty funny also...

. fun game , much better after energy removal update,but a steam game not linked to my steam wallet ! wtf
