I just started learning C# programming and I'm trying to implement the "xy" test code (available at: This is my code and I'm using Visual Studio 2008 using System; using System.Collections.Generic; using System.Linq; using System.Text; using System.Threading.Tasks; namespace xy { class Program { static void Main(string[] args) { Console.WriteLine("Enter 2 numbers."); int a = int.Parse(Console.ReadLine()); int b = int.Parse(Console.ReadLine()); Console.WriteLine("Result: {0}", a + b); Console.ReadKey(); } } } I have to mention that I am using Visual Studio 2008 Express. I tried building the application but I am getting "xy".cs(9,25): error CS1665: Cannot convert from 'System.Collections.Generic.List' to 'int' This is a compile error, not a runtime error, and is caused by the fact that there is a list of integers inside the List that is being enumerated, and enumeration requires an int to be enumerated.
